

Sonic Wash

Non-Caustic, water-dilutable, low residue degreaser

Product Features

- Fast and effective cleaning performance that surpasses that of most conventional caustic-based products
- *EZ-Rinse* technology virtually eliminates residue. Even dried on residue can be rinsed off surfaces with minimal effort.
- Formulated to provide a spot-free and streak-free shine
- Concentrated for cost effective dilutions
- Environmentally conscious and biodegradable
- Free of the bad stuff: NPE-free, Phosphate-free, Butyl-free, Solvent-free, VOC-free and does not have a flash point
- Designed for use on most surfaces when properly diluted, including aluminum, chrome, glass, plastic, and painted finishes

Description

A highly concentrated, non-caustic water dilutable degreaser & cleaner. Sonic Wash is highly versatile and can be used in a wide variety of general cleaning applications.

It is a caustic-free and silicate-free cleaner that results in easier rinsing and less potential for residues to be left behind. This product is specially formulated using a unique blend of deposit penetrating surfactants, wetting agents, water conditioners and softening agents. Sonic Wash is capable of cleaning a wide variety of deposits and, when used as directed, is formulated for use on virtually all surfaces including aluminum, chrome, glass, plastic, and painted surfaces. In many cases, it will out-perform more hazardous, caustic based cleaners.

Sonic Wash has unique rinsing characteristics which virtually eliminates residue, reduces water spots, and contributes to shine.

Applications include

- General purpose pressure washing & foam cleaning
- Commercial Truck and Vehicle Washes
- Plant cleaning
- Cleaning shop floors
- Removal of greases and oils

Available Packaging

4x4L cases 205 L drums
20L pails 1000 L totes
55L drums

1451 Highway Ave SE Redcliff, AB

Directions For Use

For most pressure wash and vehicle wash applications dilute Sonic Wash between 1:40 and 1:100 with water and apply to surface via suitable foam sprayer or via high pressure wand wash. Let stand for up to 10 minutes depending on the severity of the cleaning task. Some agitation may be required, and product should be rinsed prior to drying. (Although Sonic Wash is formulated to remain free-rinsing even if allowed to dry, product should be rinsed off surface prior to drying in order to maintain cleaning effectiveness)

Note: Typically Sonic Wash has good aluminum compatibility at dilutions of 1:40 or further, but compatibility should always be evaluated in an inconspicuous area prior to use and allow to dry to determine compatibility.

For high pressure operations dilution rates of up to 1:250 are typically effective. Use these ratios as a starting point to determine the ideal feed ratio to produce the desired results. These ratios may also vary depending on water conditions and the nature of soil. If possible, use warm to hot water (40-60 C) when diluting this product as the higher temperature will enhance the performance of the product.

RINSE THOROUGHLY FROM ALL SURFACES

Product Properties

Appearance	clear red liquid
Odor	virtually odorless
Foam color	white
Specific Gravity, at 20°C	1.00-1.10 kg/L
Flash Point	none
Freeze Point	0°C
pH, 1% solution, at 20°C	9-11
Shelf Life	1 year minimum
