

# Ultra Sani 6

## Low Temperature Dishmachine and Third Tank Sink Sanitation

### Product Features

- Low cost performance – extremely efficient sanitizer specially designed to achieve optimum results using economical low temperature water
- Delivers sparkling sanitary results in seconds
- Designed for use as a final rinse sanitizer for low temperature dishmachines, third tank sink or anywhere an effective sanitizer is needed
- Highly efficient destainer for coffee stains or other oxidizable stains

### Description

ULTRA SANI 6 is a concentrated chlorinated solution that contains 6% sodium hypochlorite.

The high-performance product has been formulated specifically as a final rinse sanitizer for low temperature dishmachines, third tank sink or anywhere an effective sanitizer is needed.

### Product Properties

Appearance	Clear Yellow Liquid
Specific Gravity, at 20°C	1.08-1.16 kg/L
Flash Point	None
Freeze/Thaw Stability	Protect
pH, (concentrate)	11.0-12.5
pH, (use dilution)	9.5-11.5
Scent	Characteristic chlorine
Solubility	Complete

### Use Dilution Table

Available Chlorine	Dilution
25 ppm	50 mL per 100 L
50 ppm	100 mL per 100 L
100 ppm	200 mL per 100 L
200 ppm	400 mL per 100 L

### Directions for Use

#### Three Tank Sink Sanitization

May be used in final rinse waters for sanitizing hard nonporous surfaces which have been cleaned with a suitable cleaning agent followed by a potable water rinse.

Sanitize in the third tank by immersion in a solution of 100 mL per 100 L (100 ppm) of water for a minimum of 2 minutes and at a water temperature > 45°C.

Use concentrations of available chlorine should not exceed 200 ppm in the final rinse waters and all reasonable precautions must be taken to avoid contamination of food.

#### Low Temperature Warewashing Sanitation

Product should be automatically dispensed through low energy dishwashing machines. Operating conditions will affect use concentrations. Local Public Health requirements will determine use concentration.

#### Equipment Sanitization

For sanitizing food processing and beverage plant equipment, rinse with a 200 mL/100 L (200 ppm) solution of ULTRA SANI 6 for 2 minutes. At higher concentrations, a final potable water rinse is required.

### Available Packaging

- 4 x 1 gal Case
- 2 x 2.5 gal Case
- 5 gal Pail
